3 features to help you to configure with the Client expectations ZSIGN, ZSDSI and ZDSLP

1- Hide Disagree option : HR feature: ZSDSI with return value 'X': "Signed with no agreement" option is hidden, and the user can only choose option "Signed".

2- Hide New payslips in myPay if the last payslip is signed by the end user with no agreement.: HR feature: ZDSLP with return value 'X': new payslips won't be shown if the last payslip is signed with no agreement.

ZXADP\_516\_ESS\_PAYSLIP\_DRAFT  
URL : <https://ld1adm.ehc.adp.com/gvservice/home/apple>

1. User : 47000061  
Pwd : Welcome@1

2. User : 47000583  
Pwd : Welcome@1

As discussed, for the first user, we are not able to see any of the three loaded payslips. For the second user, we have run the program ZR\_XADP\_M47\_DIGITAL\_PAYSLP for one period. Able to see MyPay result for that period but unable to see the payslip. When I try to sign it, its throwing an error "Payslip already signed".

#### Git commands:

Git bash here opens the command prompt

Git init - creates a local repository in your machine

Git remote add origin "<path from gitHub>" - adding github location as master/origin/source code repository

Git pull origin master

Clear

Git status - to check the file status in the local repository

Git Add - to add a file to the index

Git commit -m "changed <file name>"

-m parameter for a message for the commit

When a committed file is modified, it has to be re-added to index and then committed.  
Git status will show the modified and new files

Multiple files to be added to index

Git add -A (capital A) for index

Multiple files to be committed

Git commit -a (small a) for commit

git commit -am'.'

Adds a commit with the message '.'

git commit --allow-empty-message -m ""

Git log - summary of the project  
Q to exit git log

A proper, well written git log is an important indicator for how well thought out a project is.

If not committed with a message, prompt window to enter the message appears  
Enter the message,

Press Esc and then type :wq to save and exit.

Git pull = Git fetch + merge

A commit message should answer three primary questions;

- Why is this change necessary?
- How does this commit address the issue?
- What effects does this change have?

<http://reinh.com/blog/2008/04/18/git-push-just-the-tip.html>

Git branch firstbranch

Git checkout firstbranch

\$ ls : list of all files

Branch has all files

Git checkout master

**Merge:** Whenever you are merging, you should be checkedout to destination branch

Git merge firstbranch (source of the new files)

To revert to previous version of the file

Git checkout d9f2056f revert.txt  
1st 8 characters of the commit reference ID in git log

```

    ${container_loc}      c:\projects\MyProject2\MyFolder
    ${resource_loc}      c:\projects\MyProject2\MyFile.txt
    ${project_path}      /MyProject2
    ${container_path}     /MyProject2/MyFolder
    ${resource_path}      /MyProject2/MyFolder/MyFile.txt
    ${project_name}       MyProject2
    ${container_name}     MyFolder
    ${resource_name}      MyFile.txt
    ${build_type}         none
  </p>

```

ghp\_E9qO7hkocDoL30pPzTkfP27nk6jtY2feYKF

Steps:

- You have code in your local in a folder
- Declare to git your user name and email
- Navigate to the folder and initialize
- Push your code to staging/stash
- Commit your code from staging to local repo
- Give the remote repo address from your cmd line
- Push the code to remote repo

Generate Token: <https://docs.acquia.com/pipelines/cli/github/reqs/>

1. Change the settings for your GitHub profile by clicking your profile image in the upper right, and then click **Settings**
2. At the bottom of the left menu, in the **Developer settings** section, click the **Personal access tokens** link.
3. On the [Personal access tokens](#) page, click **Generate new token** at the top of the page

1.

# GVPD - SAP

Monday, November 03, 2014 11:33 AM

Shared location for PECI File:

[\\hyrdfiler1\VolHome\Talend\\_job\PECI](\\hyrdfiler1\VolHome\Talend_job\PECI)

Edit **RUN\_PECI\_G2\_run.bat**, copy paste

```
--context=Default --context_param PECI_FilePath=C:/ADP/PECI/WDI_TQ3002_20170209002202_AUPECI_HRMD01_DUT8G2I.SAP --  
context_param G2_File=C:/ADP/G2/TQ3002_20170209002202_AUPECI_HRMD01_DUT8G2I_2K.SAP --context_param  
Config_File=C:/ADP/CONFIG/TQ3_002_AU_WD_PECI_CFGFL_01.xml
```

## ADP Folder structure:

CONFIG file path: TD3\_002\_JP\_WD\_PECI\_CFGFL\_01.xml, within inverted commas

PECI file path: WDI\_TD3002\_20191107004924\_JPPECI\_HRMD01\_DUT8G2I.SAP

G2\_File: **Remove** WDI\_

Save and run the bat file

## To be deleted:

.zip  
Jobinfo.properties  
RUN\_PECI\_G2  
lib

Copy latest zip from shared location, extract and run .vbs file, Click YES if TD3/TQ3 SAP screen is open, NO if CONFIG folder is updated with the relevant file.

Workday batch errors:

ZCON

Batch errors > workday batch errors

G2 load ID: 20190906074408

Web service log - display

SAP release version: System > Status > Product version > search icon

API timeout :

3 parts of validation:

1. JWT token validation at portal : 10 sec
2. Client in token is validated in SAP: 10 sec ( increased to 30 sec for EDI )
3. Response of the API: 10 sec ( increased to 4.5 min to align with workday )

ZREV - portal specific transactions, programs

PE03 - Process features

LR1/1 --> PR1/2

LQ1/2 --> TQ1/2

LT3 --> TD3

/o - new window

username: surapu.gurugubelli  
password: Nihitha1011

40% of Basic	123,120.00		I				
	56,220.00						

Actual HRA component of salary:	$\text{Rs.}13,000 \times 12 = \text{Rs.}1.56 \text{ lakh}$
50% of his basic salary, as he stays in Delhi:	$50\% \times \text{Rs.}30,000 \times 12 = \text{Rs.}1.80 \text{ lakh}$
Actual rent paid minus 10% of basic salary:	$(\text{Rs.}10,000 \times 12) - (10\% \times \text{Rs.}30,000 \times 12) = \text{Rs.}1.2 \text{ lakh} - \text{Rs.}36,000 = \text{Rs.}84,000$

Since Rs.84,000 is the lowest value above, this is the amount of tax-exemption Mr. Ganesh can receive on HRA. The rest of the HRA amount received will be taxed as per his income slab.

### Client - Server communication:

SSE (Async data push from server)

WebSocket (communication protocol) - Server push

Polling (Long and Short) - Client Pull

<https://codeburst.io/polling-vs-sse-vs-websocket-how-to-choose-the-right-one-1859e4e13bd9>

Potential Response time and Polling time

120 iterations with a 3 second pause is 6 minutes ( $120 * 3s = 360s / 60 = 6min$ ).

120 iterations where the response time is just under 5 minutes ( $120 * 5min = 600min$ ).

Thread Dump analysis - Spike in CPU usage - Treadmill pattern

WFN, Production BVT

**License server:**

CDLITTAUFTLIC01

Redundant Server: DC1RFIATALMH05

ALM URL : [http://iatalm-3.es.oneadp.com/qcbin/start\\_a.jsp](http://iatalm-3.es.oneadp.com/qcbin/start_a.jsp)

Domain : ESYSTEMS

Project : ONBOARDING

User: gangigua

Password: adpadp

**Initial Setup:**

1. OR - create from UFT, existing issue from ALM  
When created from ALM, its not visible in UFT for [http://iatalm-3.es.oneadp.com/qcbin/start\\_a.jsp](http://iatalm-3.es.oneadp.com/qcbin/start_a.jsp)
2. New application area from ALM is working, check in
3. New function library from UFT
4. Open Application area and link the OR and Function library
5. While opening a business component, give ALM path for component and give app area
6. Start scripting by adding objects to your OR.

## Update Center

<https://updates.jenkins.io/update-center.json>

<https://updates.jenkins-ci.org/current/update-center.json>

# GIT CHEAT SHEET

presented by TOWER > Version control with Git - made easy

## CREATE

Clone an existing repository

```
$ git clone ssh://user@domain.com/repo.git
```

Create a new local repository

```
$ git init
```

## LOCAL CHANGES

Changed files in your working directory

```
$ git status
```

Changes to tracked files

```
$ git diff
```

Add all current changes to the next commit

```
$ git add .
```

Add some changes in <file> to the next commit

```
$ git add -p <file>
```

Commit all local changes in tracked files

```
$ git commit -a
```

Commit previously staged changes

```
$ git commit
```

Change the last commit

*Don't amend published commits!*

```
$ git commit --amend
```

## COMMIT HISTORY

Show all commits, starting with newest

```
$ git log
```

Show changes over time for a specific file

```
$ git log -p <file>
```

Who changed what and when in <file>

```
$ git blame <file>
```

## BRANCHES & TAGS

List all existing branches

```
$ git branch -av
```

Switch HEAD branch

```
$ git checkout <branch>
```

Create a new branch based on your current HEAD

```
$ git branch <new-branch>
```

Create a new tracking branch based on a remote branch

```
$ git checkout --track <remote/branch>
```

Delete a local branch

```
$ git branch -d <branch>
```

Mark the current commit with a tag

```
$ git tag <tag-name>
```

## UPDATE & PUBLISH

List all currently configured remotes

```
$ git remote -v
```

Show information about a remote

```
$ git remote show <remote>
```

Add new remote repository, named <remote>

```
$ git remote add <shortname> <url>
```

Download all changes from <remote>, but don't integrate into HEAD

```
$ git fetch <remote>
```

Download changes and directly merge/integrate into HEAD

```
$ git pull <remote> <branch>
```

Publish local changes on a remote

```
$ git push <remote> <branch>
```

Delete a branch on the remote

```
$ git branch -dr <remote/branch>
```

Publish your tags

```
$ git push --tags
```

## MERGE & REBASE

Merge <branch> into your current HEAD

```
$ git merge <branch>
```

Rebase your current HEAD onto <branch>

*Don't rebase published commits!*

```
$ git rebase <branch>
```

Abort a rebase

```
$ git rebase --abort
```

Continue a rebase after resolving conflicts

```
$ git rebase --continue
```

Use your configured merge tool to solve conflicts

```
$ git mergetool
```

Use your editor to manually solve conflicts and (after resolving) mark file as resolved

```
$ git add <resolved-file>
```

```
$ git rm <resolved-file>
```

## UNDO

Discard all local changes in your working directory

```
$ git reset --hard HEAD
```

Discard local changes in a specific file

```
$ git checkout HEAD <file>
```

Revert a commit (by producing a new commit with contrary changes)

```
$ git revert <commit>
```

Reset your HEAD pointer to a previous commit ...and discard all changes since then

```
$ git reset --hard <commit>
```

...and preserve all changes as unstaged changes

```
$ git reset <commit>
```

...and preserve uncommitted local changes

```
$ git reset --keep <commit>
```

Alberto Savoia ([www.agitar.com/company/000009.html](http://www.agitar.com/company/000009.html))

The Linux HTTP Benchmarking HOWTO (<http://www.xenoclast.org/doc/benchmark/HTTP-benchmarkingHOWTO/HTTP-benchmarkingHOWTO.html>)

Another oldie but goodie is simply titled "Performance tuning" (<http://www.kalamazoolinux.org/presentations/19991221/>). This is a slide deck created by Adam Williams, presumably for a class or a conference in late 1999. This presentation is significantly more advanced, and it provides the kind of information that will either help you achieve performance tuning bliss or start you down the path toward reinstallation

For more up-to-date information, I recommend "Performance Tuning for Linux: An Introduction to Kernels" (<http://www.informit.com/articles/article.asp?p=389712&seqNum=1>). This is actually a sample chapter from the forthcoming book "Performance Tuning for Linux Servers," by Sandra Johnson,

Gerrit Huizenga and Badari Pulavarty (Prentice Hall PTP, 2005)

Issue	Probable Root Cause	Fixing the issue/Whom to Contact
Blank Page Clicking on iHub/Static Content Issue with iHub	iHub static version property update might be missing during deployment.	CM Team
Error when sending BODs from BOD Tool	Not enough space on server or Server might be down	Contact <b>eStart Development</b> Team
Not receiving BODs to iHub	BPM might be down Error in <b>eStart BOD processing Status</b> Link. If there is no error in <b>eStart BOD processing Status</b> , there might be issue with Infolink	1. If BPM is down contact BPM-Sav-Dev < <a href="mailto:BPM_Sav_Dev@ADP.com">BPM_Sav_Dev@ADP.com</a> > 2. If BPM is not down, then Check for the BOD status in <b>eStart BOD processing Status</b> in <b>iHub Home page</b> 3.If there is no log for the particular company in <b>eStart BOD processing Status</b> screen then BOD is not processed in Infolink or some issue with Infolink queue configurations. You can contact <b>Infolink DL - DE Team – SD Dev; DataExchange - India</b>
Not getting activities on Project Dashboard/Workflow Tracking is going blank/giving IMPLTOOL error	BPM portal might be down	1. If BPM is down contact <b>BPM-Sav-Dev</b> < <a href="mailto:BPM_Sav_Dev@ADP.com">BPM_Sav_Dev@ADP.com</a> > 2. If BPM is not down and still you are not receiving activities, check if any activity is suspended in workflow
System Activity is suspended	End point may be wrong in BPM Or Some other integration failure	1. If end point is incorrect update the end point in BPM and resume the suspended task 2. If end point is correct and still system task is suspended/ resume it once - if you still see the issue, check with <b>iHub DEV team</b>
Unable to establish connection error during ISI client creation	iSi down	Send an email to <b>Identity Services Environment &amp; Support</b>
errcode:IMPTOOL during AC client creation	AC company code might be existing in ISI	Cancel the project and send in a new AC code which doesn't exist in ISI

Error creating WFN client	Might be Duplicate code	1. Check for the SYS Error logs under <b>iToolsWS</b> module in <b>Central Farm</b> and see if the error is due to <b>duplicate code</b> 2. If not duplicate code <b>check with iHub Dev team.</b>
Error creating WFN client in Client DB	DB issue	Check with DB team <b>PayeXpert dev DBA</b>
Error saving Client Configuration/CCW exceptions during Portal client creation	Portal issue	Check with <b>Portal Integration Development Triage</b>
Profile assignment issues during creation	iSI issue	Check with <b>Identity Services Environment &amp; Support</b> team
Any other integration issues i.e. Core export/Talent export/Ben export/HR Refresh/Payroll refresh	N/A	Check for the sys error/sys out logs under <b>iToolws</b> module in <b>Central Farm</b> and contact <b>iHub Dev team</b>
Any UI issue..i.e blank screen on particular page or clicking on project is going blank	N/A	Check for the sys error/sys out logs under <b>iTool01</b> module in <b>Central Farm</b> and contact <b>iHub Dev team</b>

- **User creation in eStart:** To edit the user permissions, select an existing user, in the URL, replace the new user ID to get the new user details. Workaround is because of an existing issue.
- **DON'T create company name with an apostrophe**
- **REMEMBER, to send the companies to right env. before submitting from eStart.**
- Before submitting the orders for SOA review, verify the **eSTART environment** the orders will be pushed to.  
<http://roseqaestart.adpcorp.com/ihub.service/SetupOverride.aspx>  
<http://estartqa.adpcorp.com/IHub.Service/SetupOverride.aspx>
- Create child orders after entering data to Parent company.  
You need not attach docs for child orders
- Clone the opportunities when trying to create new orders

Enter competitor information.

- When orders are cloned/copied, most of the information is copied  
Parameters which should be changed
  - Client Information:**
    - Parent company code
    - Company Name
  - Products and services:**
    - Add Products
  - Contacts, Addresses, Dates:**
    - Add Dates
  - Memo Credits:**
    - Add a solution specialist for 100% memo credits and save
  - Funding and Tax:**
    - Give account number in Funding
- If you lock the pricing, some fields would be uneditable, such as no of employees  
You need to unlock, delete the products, enter all mandatory info in the prev. page and then re-add products and lock
- For order type which has HR Product, Pay frequency should be **Monthly**
- For SOA approval, enter company code, Approve  
Approve the child orders first and finally master order
- In Salesforce, to accept the sales orders  
AE Code should be N9,  
Uncheck the accept check box  
To sync it with Estart, change the zip and save.

**IAT Runs:**

Every Monday, Wednesday, Thursday and Friday

there are two Production Runs scheduled for IAT/Preprod testing.

They run at 10:00 AM(7:30 PM) and 3:00 PM (12:30AM) EST.

Conversions are automatically processed. All other types of runs require the submission of a Company Transmittal (60 Card) to trigger the payroll to be processed in one of the scheduled Production Runs

Project ADP.SAW.BL.Deployment

This build requires parameters:

BUILD\_LABEL

10.0.0.14636

Build label should be formatted as: S.A.BB\_CC  
A - major version. (ie. 0, 5, etc)  
BB - minor version. (ie. 00, 01, 02, 03, 04, etc)  
CC - last successful build number.  
An existing build can be deployed if a BL package already exists.

DEPLOY\_ACTION

deploy\_execute

do\_all: Creates BL package and deploy job and executes them.  
package\_only: Just creates the BL package. ENVIRONMENT is irrelevant if this is chosen  
deploy\_only: Creates the deploy job from an existing BL package.  
execute\_only: Executes an existing deploy job.

PACKAGE\_SET

SAW

## Guidelines DIT 9.0:

**Headline:** CDN

**Tags:** WFN 9.0

Tag WFN 9.0 Upgrade – to be used for **specific upgrade issues** (Like to Like, V8 to V9 upgrade, etc)

### Portal Defects:

Issues that require Portal intervention must be logged against the **Portal Inbox** and assigned to **PaaS 3.1 Release Track** (Release field).

### WFN Inbox:

Non-project/Scrum specific defects should be logged against WFN Inbox.

### Component:

Select appropriate value from the drop down, if you do not get the related value please let me know so that I can get it added to the list.

### Workaround:

Please provide the work around as part of description, if there is no work around please say Work around as NA. Trying to get a new field for this, will let you if we get that.

# OneNote Basics

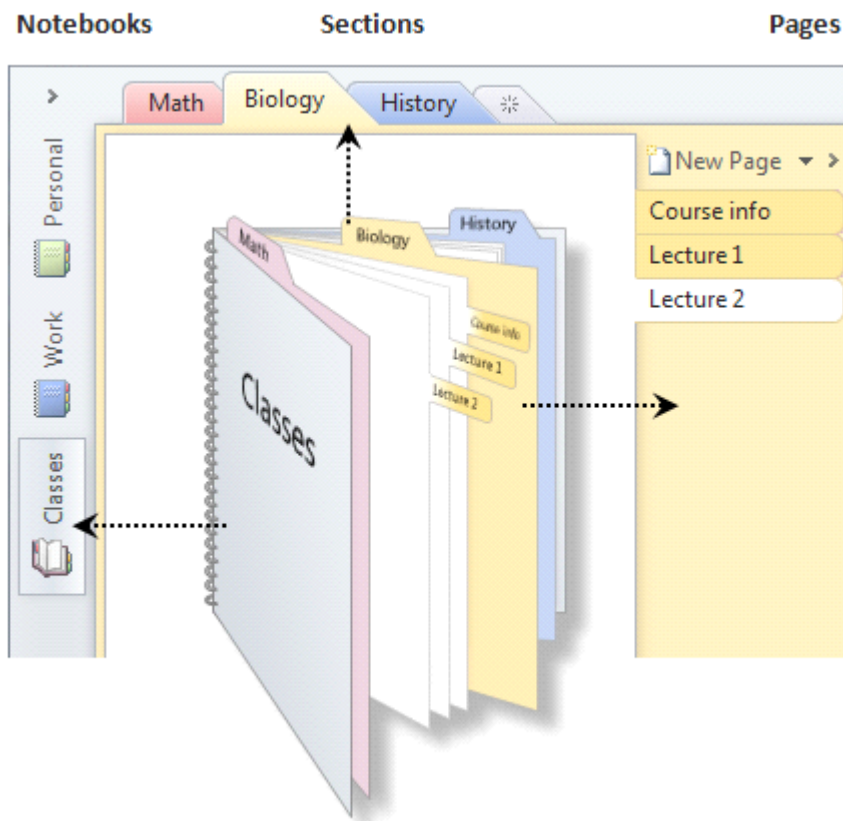

## Take notes of many types

See **Home >** and **Insert >**

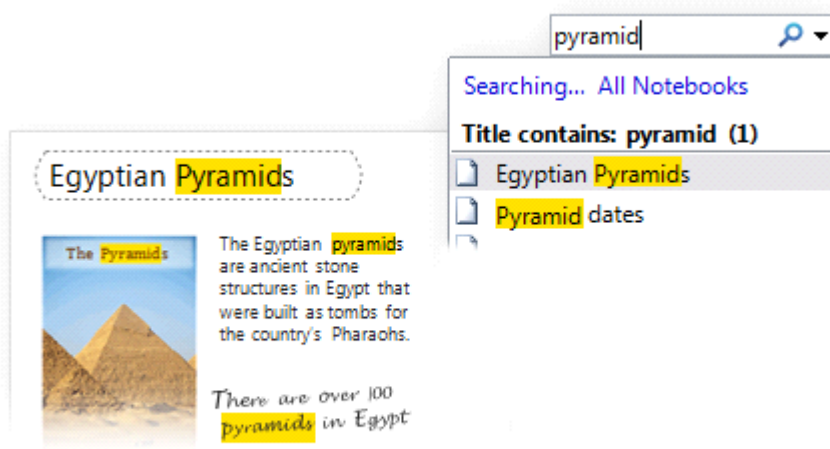

OneNote saves automatically, so you don't lose anything.

## Organize

Create as many notebooks, sections, and pages as you need.

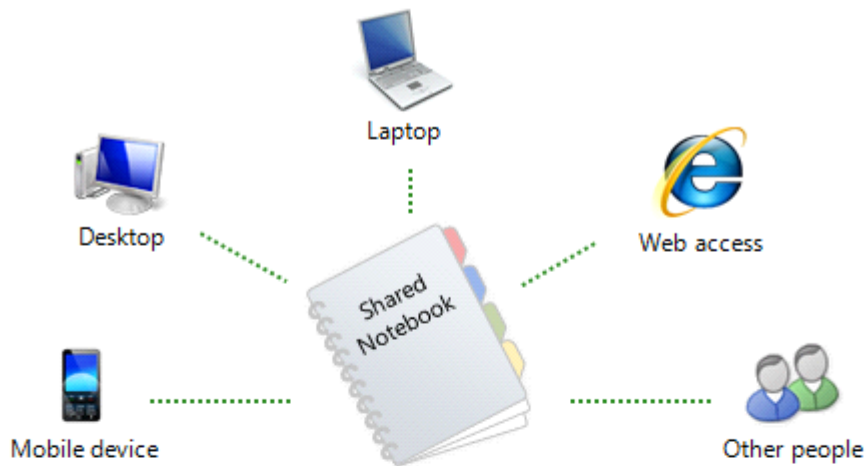

New Notebook:  
**File > New**

## Search

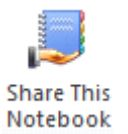

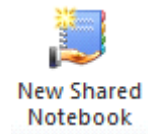

Jump to favorite pages quickly.

Find even handwritten notes or text in pictures!

Share with yourself or others

Share >

Access your notes from anywhere!

 Automatic sync. Edit even while offline.

Team Notebook example:

Meeting Notes
Project Info
Work Items
Training

Overall team status

Person	Work item	Deadline	Status
Jim	Writing	Oct 21	In progress
Ann	Artwork	Oct 25	Concept sketches Everyone, check them out on <a href="#">this page!</a>
Tom	Marketing	Nov 15	Not started

High-level plan
Overall team sta...

Comments
Concept sketches

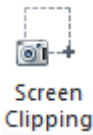

# Top Uses

## Collect product screen clippings

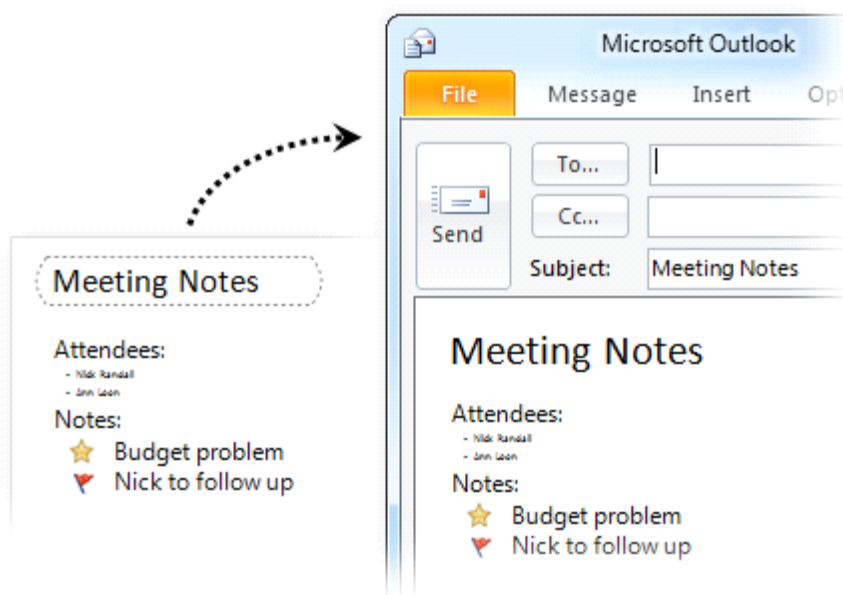

Clip maps, diagrams, car photos, weather, wedding dresses, etc.

Insert >

Screen Clipping

or hold:

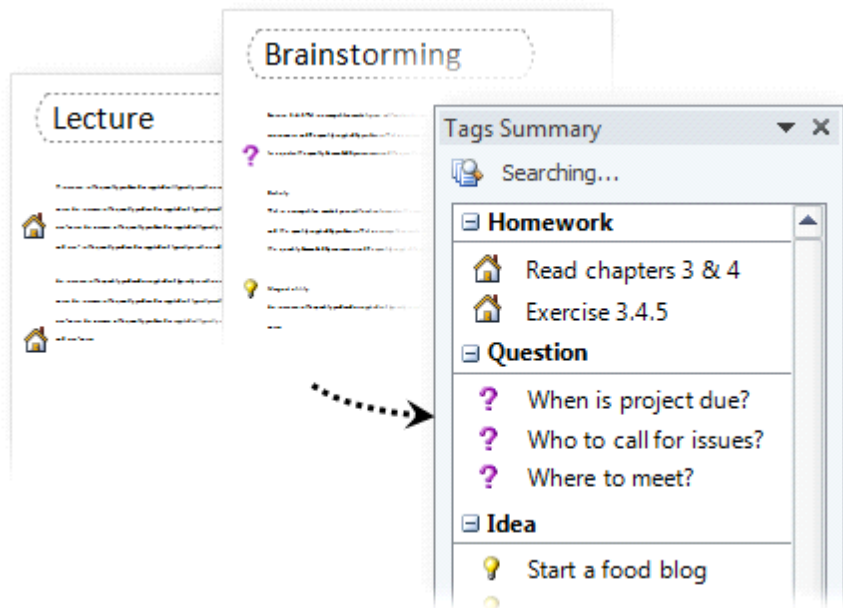

**E-mail out meeting notes,**  
instructions, status, work items, etc.  
Recipients don't need OneNote.

Share >

E-mail Page

## Tag and find important items

Homework, ideas, billable items, customer requests, to-dos, etc. You can customize your own tags.

Right-click a note > Tag

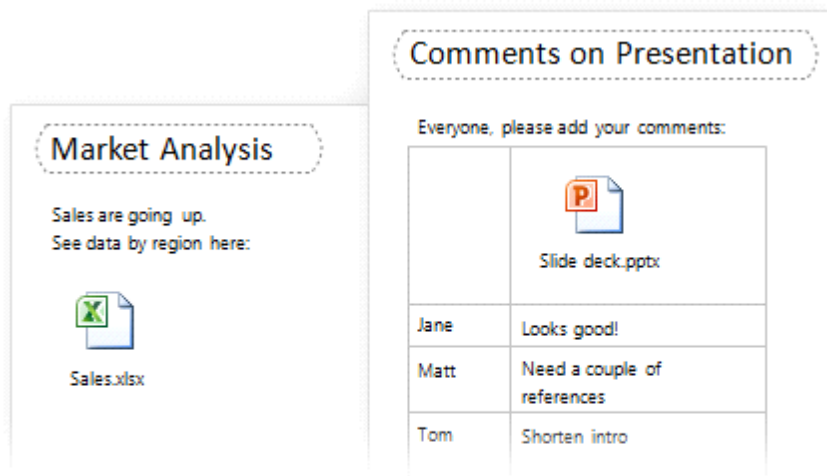

Home > Find Tags

## Collect articles from the Web

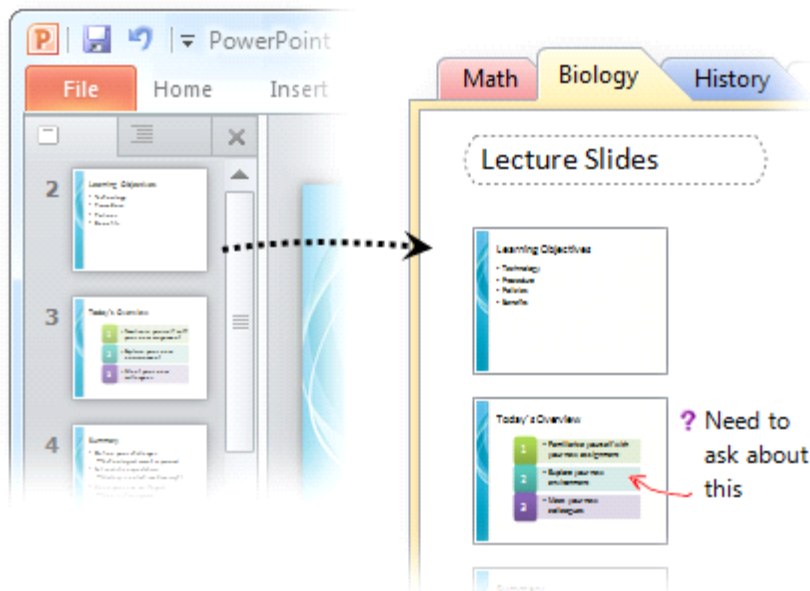

News, research, quotes, etc. OneNote preserves the link back.

Right-click in IE > Send to OneNote

**Keep project documents together with your notes**

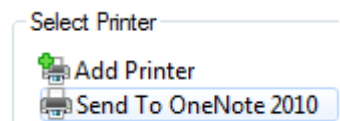

Insert >

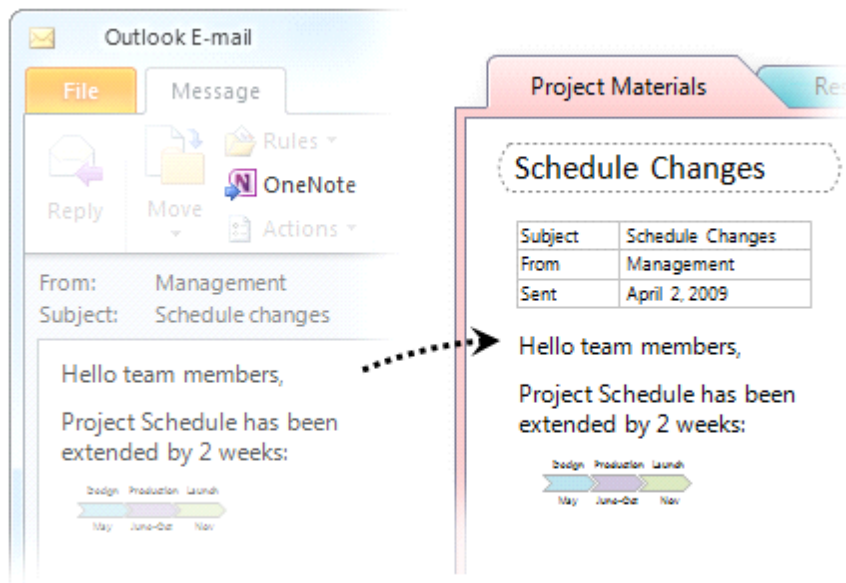

**Annotate lecture slide printouts**

Print presentations, documents, or anything else into OneNote for comments or future reference.

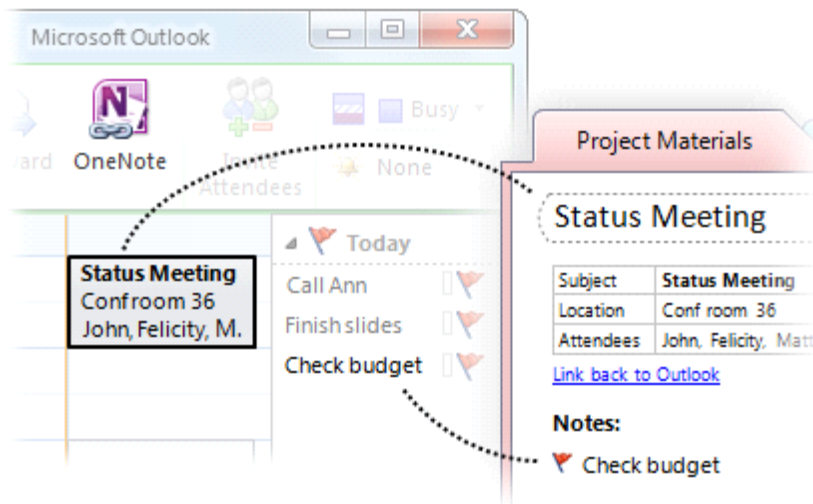

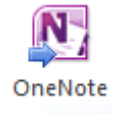

**Print from any app >**

**Keep key project e-mails together with your notes**  
Send e-mails to OneNote.

In Outlook >

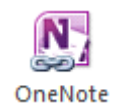

**Link meeting notes and tasks with Outlook**

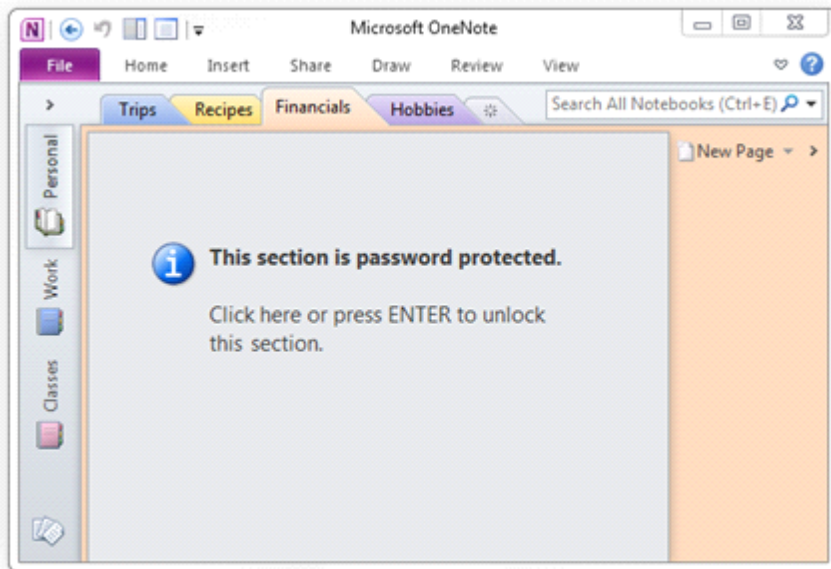

Home >

In Outlook >

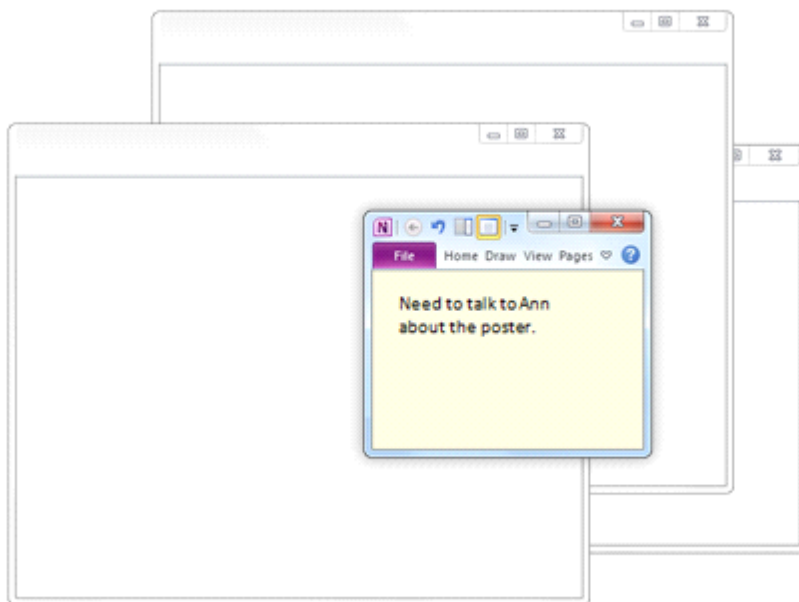

## Protect sensitive information

Bank account information, web site logins, private journal, etc.

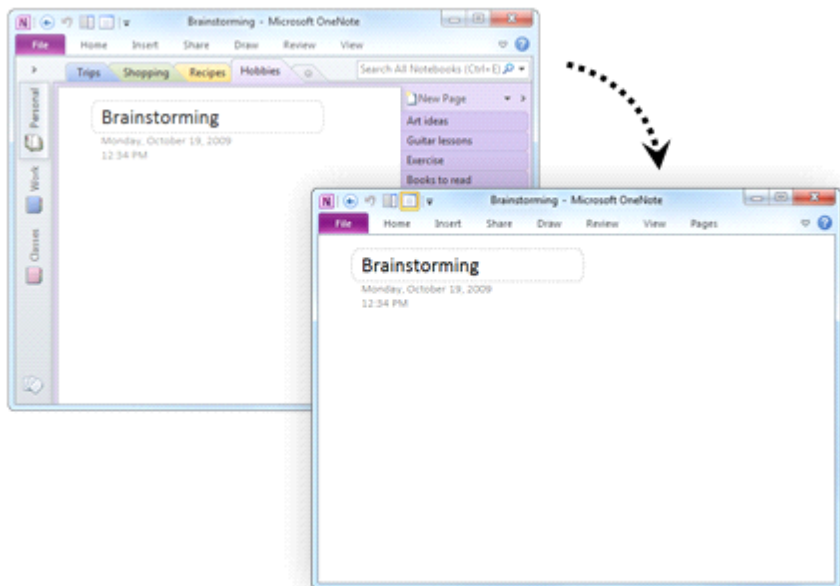

**Right-click**  
section tab > **Password Protect**

## Jot a note quickly

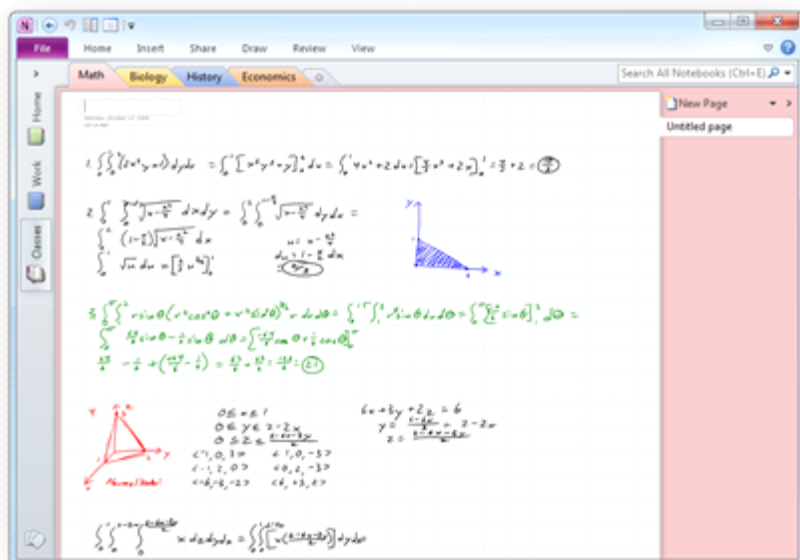

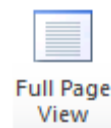

It goes into your Unfiled Notes section.

**Hold:**  + N

## Brainstorm without distraction

View >

## Handwrite class or meeting notes on a Tablet PC

You can even search handwriting, or convert it to text.

## Other Tips

- Create **tables** simply by typing some text and pressing TAB.
- **Calculator**: type Space after "=" in expressions. For example: 321\*45+876=
- Try **Page Templates** in the New Page drop-down menu. Make your own templates for meetings or projects.
- **Record audio** of a meeting, synchronized with your notes, or drag in audios or videos onto your pages.

# What's New?

## New features in 2010:

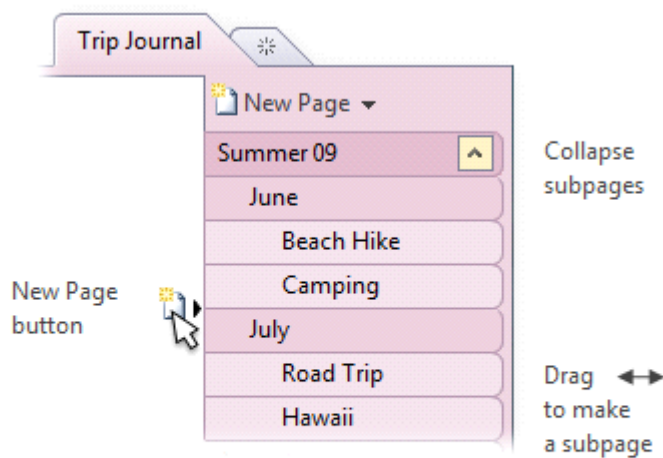

### Gather, organize, and search

- Organize page tabs better:
  - Multi-level subpages
  - Collapse subpages
- Jump to any page with a quick search
- Dock to Desktop
- Link to other notes, like a wiki
- Quick Styles for making headings
- Auto-link notes to Web pages and documents
- Insert Math
- Notes on Outlook Tasks
- Send content to any section in OneNote

### Sharing and universal access

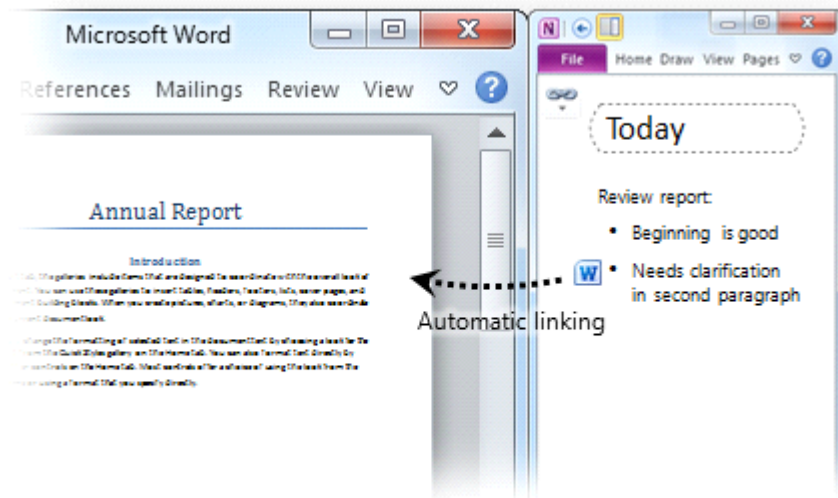

- Access from anywhere:
  - Share on the Web
  - View and edit in a browser
  - Sync notes to OneNote Mobile
- Share notes:
  - Unread changes are highlighted
  - See author initials
  - Version history
  - Find recent edits
  - Find edits by author
  - Faster sync with SharePoint

## Examples:

### Organize topics using subpages

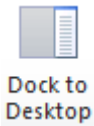

Drag tabs to indent and organize pages within a section.

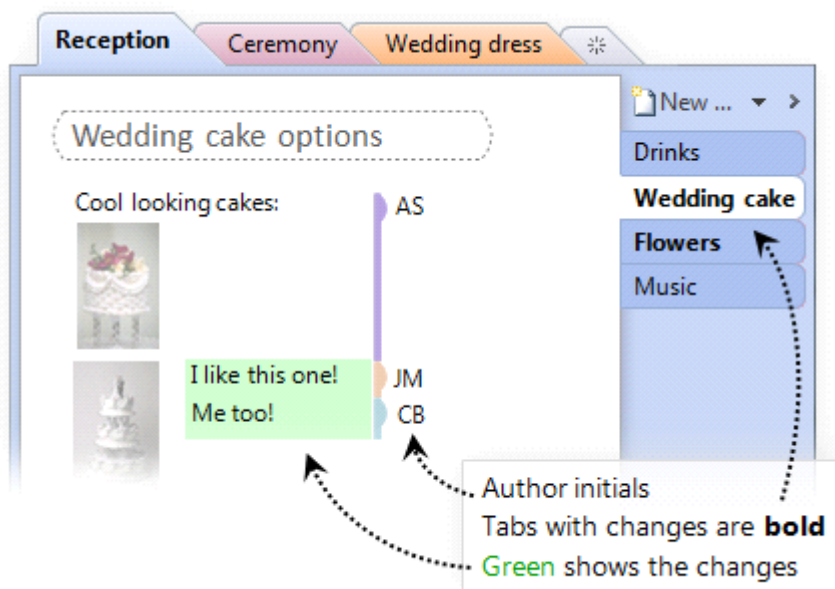

## Keep notes visible during other tasks

OneNote will link notes to documents and Web pages you view.

View >

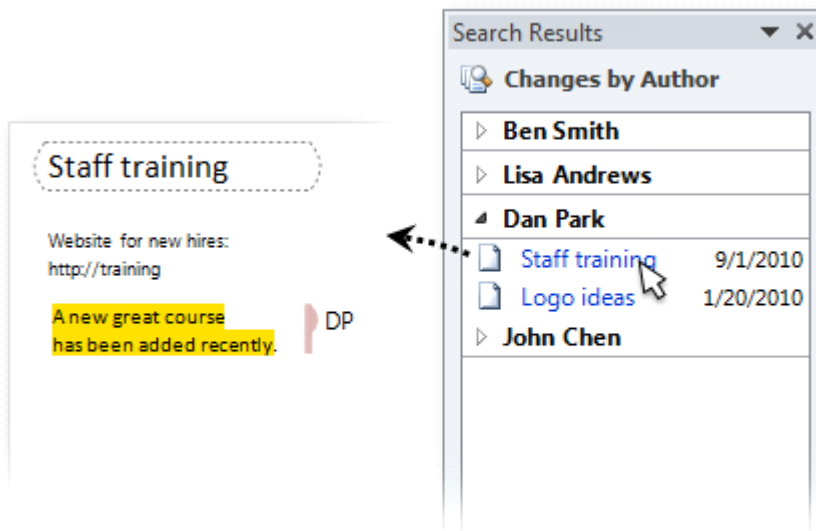

Dock to Desktop

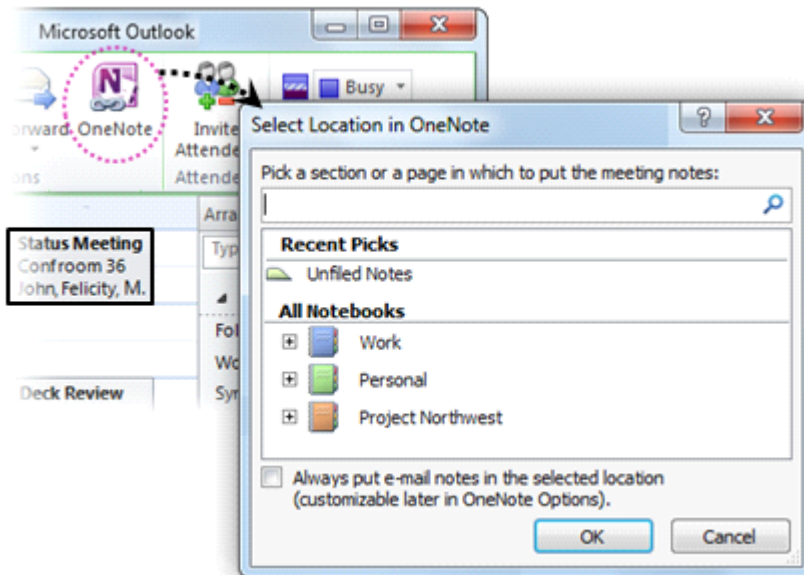

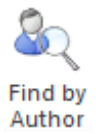

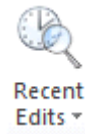

## What's new in a shared notebook?

Unread changes are shown automatically.

What notes are teammates working on?

Share >

Select location when sending to OneNote

When sending from Outlook or Internet Explorer

### Instructions for New Hires

[Set up computer](#)

[Lab procedures](#)

[Expense Reports](#)

[New Travel Site](#) (coming soon)

[[Building ma]

**Link to information for yourself and others**

**Insert >**

Link

**or type** [[page name]]

The example companies, organizations, products, domain names, e-mail addresses, logos, people, places, and events depicted herein are fictitious. No association with any real company, organization, product, domain name, email address, logo, person, places, or events is intended or should be inferred.

In our endeavor to communicate this message, we have catalogued some of the most prominent controversies that have beset the world's testing communities for several years now. In our attempt to give you an in-depth overview of some of these controversies like, Automated vs. Manual Testing, Planned vs. Exploratory Testing and Risk vs. Regression Testing, we have come up with this series of papers. The papers are primarily aimed to help you better understand the testing methodologies in question, the roles each of them play and what determines their success under specific business situations.

given the business or test situation at hand. When you ask that question to yourself, the answer could be a single methodology or it could be a blend of multiple, used in varied proportions. So before deciding one way or the other, organizations should take stock of the variables at hand like type of program - Organizational Priorities, Compliance, ERP Rollout, etc., technology - Cloud, SOA, Mobility, etc., Time and Cost Constraints, Criticality of Business Application, etc., and then determine a test methodology or strategy to be adopted in order to maximize return on investment and accelerate business success.

8R3D

#### FIT2

PCPW company - S711 (Locked)

#### IAT

PCPW - 5LEA (Open)

#### PROD:

TE6N - CAPCPI2P10

SMS2 - CAPC9OJUNP (Project Completed)

#### Employee Option Assignment page:

- What is Override value ?

Here is an additional information you are going to need to test the PCPW tool.

Companies:

- 1- AutoPay Test environment (RTE3):
  - AE3 – only regular employees (to 1 or more WFN companies);
  - 9N4 – both regular and pension employees (to 2 or more WFN companies);
  - X52 – both regular and pension employees + more than 200 Business Numbers (to 4 or more WFN companies) **1\***;
  - LP0 – only regular employees (to 1 or more WFN companies);
  - 9N8 – only regular employees (to 1 or more WFN companies);
  - AO1 – both regular and pension employees (to 2 or more WFN companies);
  - &CT – only regular employees (to 1 or more WFN companies);
- 2- AutoPay Prod environment (TORO):
  - 9PP – both regular and pension employees (to 2 or more WFN companies) **2\***;
  - 9J3 – both regular and pension employees (to 2 or more WFN companies);

Migration Utility tool:

**VM** -> 10.144.252.153

- User ID -> ADMIN\_DEV
- Password -> Password123!!

#### Tool location:

- C:\ADP\Utility\PCPWMigration\PCPWMigration.exe
- User ID -> MIGRATE
- Password -> ACEMASTER

Note:

**1\*** this company is used for the boundary testing. Verify the defects found with this company using other than this company;

**2\*** this company has both fake BN which fail the iHub validation on 'Finalize Migration' step in the PCPW tool. In order to proceed with the project, you should manually key in the following BN: 123456782-RP-0001 and 999991110-RP-0001 in the iHub screen and change the CRA Tax Packet id for all employees later in the import files generated;

Test Config - Downloads a file

### **iHUB US team**

- iTools webservice EAR – makes Client creation fail
- 
- **Cache – Session storage issues:**  
When Mandatory Earnings/Deductions are in read only mode and user is in the same page  
Verify editable earnings/Deductions
- Editing Common deductions and export to s@w
- 

### **VDL Standards:**

- Primary button (Next) in blue, to the right
- No colons to the labels
- Left navigation menu wrapping should not be there.
- All toggle buttons, field boxes, dropdowns should be below the labels
- Space between checkbox and the letter
- Hide conditional features
- Company name for Child companies is not sent to WFN during client creation process – Known issue

### **Time interview**

calls a webservice to fetch data from iHUB DB

Probable issue : Webservice call failure

or when webservice is sent, data could not be fetched from the DB

### **Practitioner permission settings:**

Menu access, People Access, Payroll access

**YEAR END:** The year-end indicator should always be false for iHUB.

### **Prod 7.1 issues:**

- HR Interview + Location : Address population

6.0 address are not copied for AC

7.0 duplicate address for AC

- When NO is selected, and BYPA page is completed for only one company code. How are the backend values sent ?
- 

Defect steps:

1. Login to WFn using the details mentioned in the credentials part
2. Navigate to Client > iHUB
3. Search for the company code that is mentioned above
4. Click on the Client interview and open the Payroll Interview
5. Navigate to

### **XB :**

-  
US Practitioner :

- Complete the Autopay setup – USA Only in Project details
- Complete the OTC according to the document
-

Product codes can be found in [Product details > Features](#).

select enhanced Payroll

we need core IS, Human Capital IS, Project Manager, TnBIS, TLMIS roles for them

Start the activities by logging in with US IS.

### **Autopay Setup default values :**

just set the quarter to any value like Q1 or Q2...

thats all

dont set any of the below values

if we run the CCI export, then we need to know which autopay env is pointing to and setup the OTC accordingly.

For the OTC setup, find which env is Autopay pointing to – then select

2PGI–

Number of days validations ?

QA life cycle

All the areas of testing – Integrated applications

- System status error : Logs
- Admin user saving payroll system type page ... Only then a Practitioner can access payroll interview (Test this)
- BPM (Savvion) issue
- Cannot send data to WFN(new business) or s@w for additional control failed – Arran resumed **System Performer** and data has been exported to downstream applications
- PURGE WFN company codes.

Pension payroll:

- Additional business / Additional control:
- When company name is different, additional control refresh gives a new regular payroll interview ?
- For a pension payroll, staggered AB (TIME)

### **User to access iHUB**

Roles/tasks should be assigned

User should be added in WFN Admin from Available members to current members

WFN Support from Available members to current members

Admin – ADP -> Security Management -> Find User -> Reset Password

When a user is created, user details are sent to mail ID

### **DEFECTS:**

1. Script errors
2. Health tax exemption maximum range
3. Earning Set Ups (typo)
4. Decimal point data entered , UI and what is in DB
5. TIME interview: Earnings

\*\*\* E1N1 – send client information suspended.

\*\*\* Company name in project details is not updated in BYPA page

\*\*\*Additional control Refresh – Address book

\*\*\*Additional control Refresh – Pension/payroll (Verify again by matching the company name)

\*\*\*Project Details – Existing client Info – Click Done

\*\*\*Differences in the Excel and Report

- BYPA page : Report Options(Xcel first page, Report in order), ROE info (report)
- Company contacts (Report)
- 

Learnings:

- For PENSION, Fed & Prov , NR4 Remittance Tax Account
- For staggered business, you should not submit any of the HR or Payroll interview
- If only one interview is submitted, then there will be a blank screen for TIME interview.
- Submit both the interviews and send an Additional business.
- **WORKAROUND:** When dropdown values are not displayed, change language preferences
- 
- Company contacts will be mandatory for ROE – Direct Filing
- Fed & Prov: RQ ID enables the freq, CSST codes

#### TIME Interview:

Activities to open the AB interview:

You have to make sure to open Time Interview AFTER complete 'Interview ready for the client' task....not before you complete this task.

- BYTA&A page : Pay frequencies are populated from CDN payroll Interview
- Data Collection Info:
  1. Addresses from CDN PI.
  2. Address book, test it.
- Earnings Master list : Load the Earnings from CDN PI

#### ADDITIONAL CONTROL:

Refresh copy from a company code is possible only for a staggered client

For an AB, new and mainframe copy are possible.

Valid scenarios:

- AC – staggered
- TIME – AB, staggered
- 

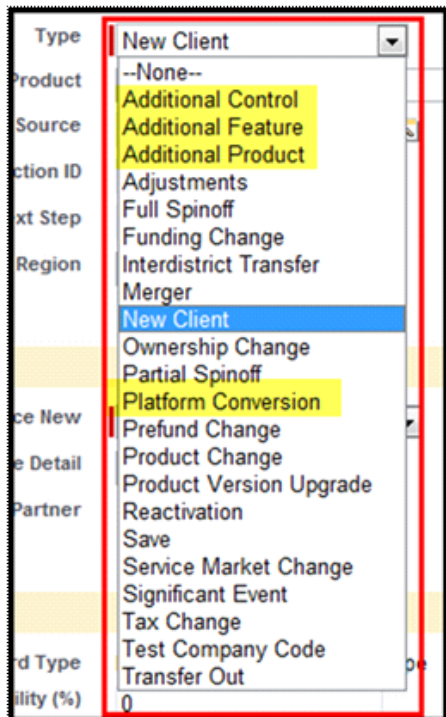

**Pension change:**

**Report Delivery address:**

## RE: DIT1+ Workflow progress error

 Kalasamudram, Dayasagar (ES)

Sent: Mon 8/3/2015 7:31 PM

To:  Desai, Varun (ES);  Dasani, Kamal (CORP);  Kabade, Saicharan (CORP)

Cc:  Gangigunta, Amarnath (ES);  Kumar-Contractor, Mukul (CORP)

### IMPORT to WFN:

#### 1. Client Creation

Payroll, HR

1. Canadian payroll, HR
2. Canadian payroll – Employee SS
3. Canadian payroll – Manager SS

2. Verify Client with Employees setting
3. Setup CRA number
4. Import

**Connections:**

**All capitals**

**WFN EMPLOYEES:**

**International Employees:**

- Enable **Global HR System of Record** in client setup wizard > services selection.
- Hire using international template

**Purged employees:**

- Import with Active value as 0 for terminated employees
- NCY trigger 2 times : Terminated employees will be purged
- Transfer an employee to different company and have the same tax form, when transfer date = position start date

Field Name	Comparison	Field Value
Employees with Payroll History	is equal to	Yes

[ADD CRITERIA TO THIS SET](#)

**Non paid employees:**

- Hire using HR only template
- Import, position ID should end with N, IS PAID column should be N

**Archived employees:**

- Terminated employees will be available for archive at Process > HR > Archive Employees

**Billing:**

- Ledger(60 card), Payroll(Conversion), PASS(manual)
- Product Code should be setup, Test company indicator should be **A**, from eOrder, it will be **P** (in progress) for 2 payrolls.
- Paytech wont billing (wont send counts to F7) when status is P
- Test Company with Bank code, transit and account number
- Product change - ELF Feed run date will be 3 months after, future run date transactions have to be verified and changed.
- Multiple records in F2, F7 can lead to duplicate records in Billing report.
- Billing feed should be run, manual job to put the counts in F4 should be run at paytech
- Process payroll should be run, on scheduled time, counts, rates will be put to F7.
- If payroll is processed once, F4 counts may not go to F7

F4 table - SELECT \* FROM PJ8.VF4\_BILLING\_COUNT WHERE F4\_COMP\_NO = 'T5F7'

F7 - PJ8.VF7\_CLIENT\_BILLING\_MTHLY

Rates, counts from eOrder - PJ8.WL1\_GENERAL\_INFO, PJ8.WL1\_GENERAL\_INFO\_2

F2 - PJ8.VF2\_CLIENT\_BILLING - Payroll processing records are listed in this table

Amar – I will be on leave tomorrow. I have updated Rajesh about this meeting.

The below o/p from the meeting can help us achieve the full automation BVT suites for iHub and PCPW.

Aim: Not to have any manual interventions for running automations.

1. What are the manual steps involved in iHub as of today in automation BVT in terms of
    - a. Data Setup
    - b. Data Clean up
    - c. Anything else?
  2. What are the manual steps involved in PCPW as of today in automation BVT in terms of
    - a. Data Setup
    - b. Data Clean up
    - c. Anything else?
  3. What from above can our Dev scrum members take up?
    - a. What efforts that it takes for our Devs to do this?
1. Can these be extended to all environments (DIT, FIT, IAT, PROD)
  1. What is it that we need from Automation team for this?

**Priority 1 obviously would be iHub BVT** compared to PCPW is what I believe, unless you think the otherwise. Let me know please.

Please publish a MOM of the meeting so we can track the progress, if feasible.

#### User creation - SecurityMaster:

- Only one security master for a client would be registered in NetSecure
- Second security Master will be a dummy user and not registered in Net Secure.

☐ User creation error message  
**Work Around:** Navigate back from iHUB.

☐ Phone number for security users should start with **973**
